

Microsoft Purview

Gain visibility into sensitive information, reduce compliance risk, and build a modern data protection strategy with Microsoft Purview

Solution Area

Digital Workplace

Business Challenge

Data is growing faster than most organisations can manage, making it increasingly difficult to understand where sensitive information resides, who has access to it, and whether it is adequately protected. As regulatory requirements continue to evolve, organisations need greater visibility into data risks, compliance obligations, insider threats, and retention requirements. Without a clear data governance strategy, businesses can face increased security exposure, compliance gaps, operational inefficiencies, and unnecessary data sprawl that drives risk and cost across the organisation.

Benefits

- Discover and classify sensitive data across your environment
- Reduce risk from insider threats and data exposure
- Improve compliance and data governance outcomes
- Receive a practical roadmap with prioritised recommendations

How We Help

Insight works with your team to assess your current data protection and compliance posture using Microsoft Purview. Through a collaborative workshop, we identify sensitive information, uncover hidden risks, evaluate compliance readiness, and demonstrate how Purview capabilities such as: **Data Classification, Data Loss Prevention, Insider Risk Management, Data Security Posture Management, Auto-Labelling, and Retention Policies** can help protect your organisation.

Microsoft Highlights

22 Specialisations including:

- Identity and Access Management
- Threat Protection

7 Partner Designations, including:

- Frontier Firm
- Security
