

Microsoft Copilot for Security Activation

Protect at the speed and scale of Al

Business Challenge

Microsoft Copilot for Security is the first generative Al security product that enables security and IT teams to defend at the speed and scale of Al. It assists them in performing tasks such as incident summarisation, impact analysis, reverse engineering of scripts, and guided response, in a fraction of the time and with greater accuracy and confidence.

To ensure organisations can use Copilot for Security to proactively manage threats and vulnerabilities they must ensure their existing M365 E5 toolset is optimised and appropriately enabled.

How we help

Insight's Copilot for Security Activate solution has been developed to ensure your organisation is equipped for AI within your security function. Our team of security specialists will guide you through a 2-week engagement to enable Copilot for Security, evaluate your existing security tooling and provide recommendations to increase coverage and maximise Copilot for Security effectiveness. The fourkey deliverables to this offering include:

Copilot for Security Enablement

Insight will deploy Copilot for Security and understand use cases to right size Security Compute Units.

Duration: 1 Week

Benefits:

- Be prepared for Copilot for Security with a Microsoft Security tooling review
- Unlock security productivity gains faster
- Rapid investigation and response

Security Tool Review

Insight will conduct a review of the following Microsoft products within your security ecosystem:

- Microsoft Defender External Attack Surface Management
- Microsoft Defender Threat Intelligence
- Microsoft Defender XDR
- Microsoft Entra
- Microsoft Intune
- Microsoft Purview
- Microsoft Sentinel

Copilot for Security Readiness Report

Insight will present our security recommendations detailing the readiness of the security tools for Copilot for Security

Prompt Engineering Training

Insight will conduct two prompt engineering training sessions to enhance the client's understanding or usage of Copilot for Security.

Copilot for Security Activate

Activate

Activate Copilot for Security and provision Security Compute Units in Azure

Assess

Assess the customers security tooling for deployment scope and effectiveness to support Copilot

Enable

Prompt engineering training for the team to maximise the effectiveness of Copilot and understand common use cases.

Present

Present findings to improve Copilot for Security effectiveness and make recommendations on Azure consumption

2 Weeks
