

# ▶ KASPERSKY ENDPOINT SECURITY FOR BUSINESS

## Select

Tools to enable a mobile workforce, ensure IT security policy conformity and block malware.

Kaspersky's 'Select' tier includes mobile device deployment and protection via Mobile Device Management (MDM) and mobile security technologies. Endpoint control tools (web, device and application) help your organisation enforce IT policy, keeping the essential elements of your IT environment secure.

Kaspersky Endpoint Security for Business — Select Tier. Featuring Control tools and Mobile Security.

## KEY FEATURES:

### POWERFUL ENDPOINT ANTI-MALWARE

Kaspersky's 'best of breed' signature and heuristics based protection operates at multiple levels in the operating system, rooting out malware. The cloud-based Kaspersky Security Network (KSN) protects users in real time against new threats.

### FLEXIBLE, GRANULAR CONTROL TOOLS

A cloud-based, categorised database of safe and unsafe applications and websites helps the administrator to set and enforce policies for applications and web surfing, while granular controls ensure that only specific devices can plug in to machines on the network.

### EFFICIENT MOBILE DEPLOYMENT AND SECURITY FOR SMARTPHONES AND TABLETS

Agent-based mobile security is available for Android™, BlackBerry®, Symbian and Windows Phone® Mobile devices. Mobile device policies and software can be securely deployed over the air to these and to iOS and Samsung devices through mobile device management.

## INTRODUCING IN THIS TIER:

### ENDPOINT CONTROLS:

#### APPLICATION CONTROL

Enables IT administrators to set policies that allow, block or regulate applications and privileges in the operating system.

#### DEVICE CONTROL

Allows the administrator to set, schedule and enforce data policies with removable storage or any other type of peripheral device — connected to any bus type, not just USB.

#### WEB CONTROL

Means that endpoint-based surfing controls follow the user — whether on the corporate network or roaming.

#### DYNAMIC WHITELISTING

Real-time file reputations delivered by the Kaspersky Security Network ensure your approved applications are malware free and help maximise user productivity.

## KASPERSKY SECURITY FOR MOBILE:

### INNOVATIVE ANTI-MALWARE TECHNOLOGIES

Combined signature-based, proactive and cloud-assisted detection results in real-time protection. A safe browser and anti-spam increase the security.

### DEPLOYMENT WITH OVER THE AIR (OTA) PROVISIONING

The ability to pre-configure and deploy applications centrally using SMS, email and PC.

### REMOTE ANTI-THEFT TOOLS

SIM-Watch, Remote Lock, Wipe and Find all prevent unauthorised access to corporate data if a mobile device is lost or stolen.

### APPLICATION CONTROL FOR MOBILE DEVICES

Monitors applications installed on a mobile device according to the pre-defined group policies. Includes a "Mandatory Application" group.

### SUPPORT FOR EMPLOYEE OWNED DEVICES

Corporate data and applications are isolated in encrypted containers which are transparent to the user. This data can be wiped separately.
